Berend Vreugdenhil

Scaling SAF a syngas development from the ICARUS project

Berend Vreugdenhil is an experienced technology developer working at TNO for over 20 years. His field of expertise and interest spans from gasification of biomass, gas cleaning and upgrading towards renewable products, such as SAF, methane, methanol, aromatics and olefins. He is currently part of the EERA Bioenergy board responsible for the Thermochemical Conversion track. He is also part of IEA Bioenergy working on gasification of biomass and waste.
