Sustainable Aviation Fuels
time for take-off

Stamatina Sideri

Stamatina Sideri is a Project Management and Business Development professional at API Europe, with extensive experience in industrial project coordination, strategic partnerships, and financial management. She is actively involved in the development and operation of APILOT, API's advanced biorefinery demonstration facility in Greece, supporting the scale-up and commercialization of innovative technologies for converting lignocellulosic biomass into sustainable biofuels, biochemicals, and high-value biobased products. Her work focuses on bridging technology development with industrial implementation and fostering international collaborations in the bioeconomy sector.
