Sustainable Aviation Fuels
time for take-off

Stella Bezergianni

Stella is a Research Director at the Centre for Research & Technology Hellas (CERTH), where she leads the development and intensification of novel technologies for carbon-neutral fuels, chemicals, and e-fuels. Her work is at the forefront of the energy transition, supported by competitive European and National research grants, as well as direct service contracts with major industrial partners globally.

A Chemical Engineering graduate from the Aristotle University of Thessaloniki with a PhD from Lehigh University (USA), Stella's expertise is backed by significant international industrial experience at ExxonMobil, FMC Corporation, and Air Liquide. Beyond her research, she has held high-level leadership roles, including serving as Chair of the Board of Directors for the NOESIS Science Center and Technology Museum. She is a prolific author of scientific publications and an active member of the European Technology and Innovation Platform for Bioenergy.
